

2000 Crime Report

William K. Finney, Chief of Police
Saint Paul Police Department
Prepared by the Saint Paul Police Department, Research and Development

Introduction

The Saint Paul Police Department crime report serves as the primary description of citywide crime statistics. The 2000 crime report is similar in nature to the format of the 1998 and 1999 crime report, containing sections describing police calls for service, Part I offense comparisons to cities of comparable population, Part I and selected Part II offense graphs, arrest demographic information, an appendix showing citywide crime maps, and an appendix listing Part I offenses by grid. Part I offenses are defined by the FBI Uniform Crime Reports as homicide, rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Further definitions are provided on the title page preceding each section.

The 2000 crime report is primarily derived from the data sent to the Minnesota Bureau of Criminal Apprehension as part of the FBI Uniform Crime Reporting system. Offense totals for all categories except homicide represent number of events, not number of victims. For this reason, offense totals of aggravated assault and rape for the years 1996-99 should not be directly compared to previous crime report totals before 1996. In all sections, data is based on the entire population defined on the section title page; sampling was not used.

The crime report represents the cumulative efforts of police officers, police management, and personnel from many divisions within the police department.

The 2000 crime report is available for viewing and printing on the internet at <http://www.ci.stpaul.mn.us/police>. Permission is granted to print, copy, or distribute individual sections of the crime report as long as the general introduction and section introduction pages corresponding to the selections are printed, copied, and distributed with them. Questions regarding the crime report can be answered by the Research and Development Unit at 651-292-3501.

Calls For Service

Calls for service include all requests for police assistance except for cancelled calls. The final disposition of a call does not always match the type of call initially received.

Total Calls for Service

2000 Call Dispositions

12 Most Common Call Types: 2000

Type	Percent	Type	Percent
TRF STOP-ADVISE	18.7%	ALARMS	4.6%

TRAFFIC ACCDNT	4.9%	SUSP ACTIVITY	2.2%

* Since July, 1999 , traffic stops contributed to calls for service.

Offense Comparisons

The following compares Part I offense totals from 1999 as listed in Crime in the United States FBI, 1999. Of comparison cities used the previous four years, Aurora, Newark, and Riverside still meet the following criteria:

1. City population within 35,000 of Saint Paul.
2. City belongs to a Metropolitan Statistical Area (MSA) as defined by Crime in the United States with a population within 1,200,000 of the Minneapolis-Saint Paul MSA .

Norfolk is excluded as it violates the above criteria. Anaheim and Raleigh slightly exceed the previous limits but are included in order to maintain 6 cities of comparison (they are among the next closest qualifying cities).

Arson is not included because it is not listed for all cities. There are many factors besides police performance which affect offense totals. Comparisons are provided to show Saint Paul's general position in the national trend with cities of similar population, not to directly compare one city's police performance to another.

<u>City</u>	<u>Pop.</u>	<u>Metropolitan Statistical Area</u>	<u>Pop.</u>

Reported Offenses

Offense totals consist of calls for service in which an official report is filed with SPPD. Offense totals represent crime events, not victims, except for homicide. If a report is written for a person who committed three offenses, the crime event will be categorized under the incident code of the most serious offense. Totals do not reflect corrections made to classifications as a result of investigation pursued after the initial report.

Actual and reported offenses are displayed on page 10. Both are reported according to Uniform Crime Reporting (UCR) guidelines required by the FBI. Reported offenses are used for comparative purposes on pages 11-20.

by Grid

Each grid contains a count for each Part 1 Offense.

All totals indicate the number of victims per grid as defined by the BCA.

Med = Median

Mean is calculated by dividing Total by number of grids with residents.

1990 population by grid was used because the 2000 data was unavailable.
